SCS162 Series Mini Tuning Fork Level Switch Operation Manual

Description

SCS162 tuning fork switch uses two wires power supply with 20~250 \cdot 50/60 Hz Vac / Vdc. Product is suitable for the liquid with density more than 0.7 g/cm³ and viscosity between 1∼10000

cSt. It also has compact size, which is suitable for applications with limited space. SCS162□ offers 3 options of plug connections: DIN 43650 · Cable Connecor · M12x1 Connector. Furthermore, the fork can be polished(Ra) to meet the requirements for particular industries like

pharmaceutical and food processing. SCS162□ is equipped with magnetic test function. It can examine the functioning of the switch after the switch is installed.

Features

- © Compact size, suitable for limited space.
- \odot Wide range of power supply from $20 \sim 250 \text{ Vac/Vdc}$.
- © 3 options of plug connections.
- © Fork polished to users' standard for industries like pharmaceutical and food processing.

1. Specification

Housing material	SUS 304
Protection	IP 65 / IP67
Torque on the hexagon	80 Nm
Plug connection	DIN 43650
	Cable Connector
	M12x1 Connector
Connection	Clamp
Material	SUS 316L
Material	316L
Length	Min. 40 mm
Surface quality	Option
Total weight	Approx. 0.4 kg
Power supply	50/60 Hz, 20~250 Vac/Vdc
Output	Contactless electronic switch
Internal current requirement	Approx. 3 mA
Load current	Min. 10 mA, Max. 350 mA
Vibrating frequency	Approx. $1KHz \pm 10\%$
Time delay	1~3 s since the measured material contacted
	1~3 s react to the measured material fall off
Fail-safe	Min./Max. detecting mode by connection
Status	Green LED-Power indicants
	Red LED-Switching status indicants
Switching point	Vertical orientation: 12 ± 3 mm from top of fork
	Horizontal orientation: 8 ± 1 mm from fork centre
	Place magnet nearby the testing spot to perform
Overvoltage category	III
Ambient temperature on the housing	-40~+80°C
Storeage and transport temperature	-40~+85°C
Operating temperature	-40~+150°C
Ambient damp	20%~80% RH non-condensed
Operating pressure	Max. 40 Bar
Viscosity	1~10000 cSt
	Protection Torque on the hexagon Plug connection Connection Material Material Length Surface quality Total weight Power supply Output Internal current requirement Load current Vibrating frequency Time delay Fail-safe Status Switching point Magnetic testing Overvoltage category Ambient temperature on the housing Storeage and transport temperature Operating pressure

Recommended relay's type for different power supply.

Brand	Model	Voltage	Current
Omron	MY2N-J	24Vdc	46
	MY2N-J	24Vdc	10
	MY2N-J	100/110Vac	11
	MKS2P	110Vac	21
	MK2PN-I	220Vac	11
Finder	62.33.8.230.0040	230Vac	10.5
	62.33.8.230.0040	230Vac	14
Panasonic	HP Service	220Vac	9.5
	HG Service	220Vac	14

2. Appearance

Types of SCS162□series as shown below:

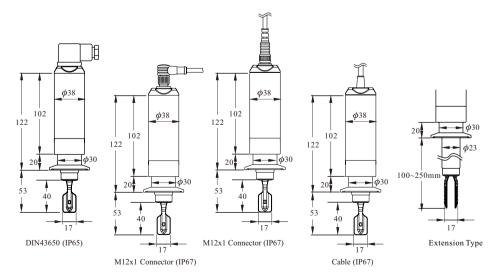

Figure 1 sizes and plug connections

3. Wiring

Power supply is AC/DC sharing. Two wires are connected with relay output(L+/N-). Please see Figure 2. O Low(Min.) Mode: number 1 pin(Brown) is connected

- to N-. No.2 pin(Black) is connected to L+ with Relay. No.4 pin(Yellow Green) goes to ground.
- **High(Max.)mode:** No. 1 pin(Brown) is connected to N-. No.3 is connected to No. 2 pin(Black) to L+ with Relay . No.4 pin(Yellow Green) goes to ground.

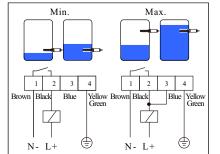

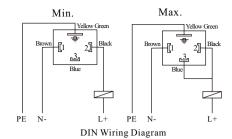

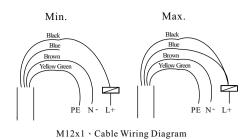

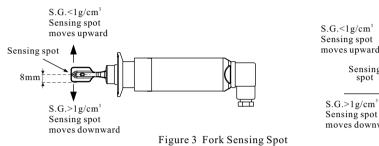

Figure 2 Two wires wiring

4. Fork Sensing Spot

 $SCS162\square$ fork sensing spot is shown as Figure 3 below. Considering testing medium is water(S.G.=1 g/cm³), sensing spot is at the fillister about 23mm from the tip. If testing medium has S.G. lower than 1g/cm³, sensing spot would be above the fillister. In contrast, sensing spot will be below the fillister.

spot 12mm $S.G.{>}1g/cm$ Sensing spot moves downward

5. Output Status

The power supply of SCS162 series is 2-wire wiring. Relay output is connected in series with power input (L+/N-). 2 modes Min/Max are available based on the pins connected.

When powered 20-250, 50/60 Hz Vac/Vdc, the green power indicator(LED) on top of the housing will be on. Please refer to the following for details.

- O Low(Min.) Mode: Tuning fork switch will be actuated 3 seconds after the power is on. Relay is NC and red LED indication is off. When tuning fork is covered by testing medium, vibration stops and relay becomes NO. Red LED indication is on.
- O High(Max.) Mode: Tuning fork switch will be actuated 3 seconds after the power is on. Relay is NO and red LED indication is on. When tuning fork is covered by testing medium, vibration stops and relay becomes NC Red LED indication is on.
- O Flashing red indicates abnormal: Possible causes overloads or short-circuit load back. equipment malfunction or wear tuning fork probe.

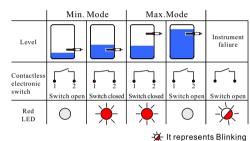

Figure 4 Min./ Max. Mode

6.Magnetic Test

After the switch is installed and powered, magnetic test function can be performed accordingly. The testing point is marked on the housing label. User holds the magnet and moves it close to testing point, the output status will switch from NO. to NC. or NC to NO. and red LED would switch ON or OFF while fork continues to vibrate. When magnet is pulled away from the testing point, the output status and red LED would return as default while fork continues to vibrate. The purpose of testing is to confirm the wiring and functioning are correct.

7.Installation

Horizontal Installation:

1. Can be applied in viscosity, powder, and liquid. Do not install near substance inlet.

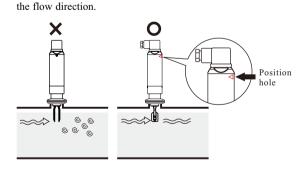

2. When installing the product. The position hole must be upward direction. If not, incorrect installation could be damage the product.

Vertical Installation:

1. Opening of the two fork blades is to be as

2. Do not install near substance inlet.
